KUROBUTA PORK

Kurobuta, meaning black (kuro) pig (buta), unlike commercial pork, has its own intrinsic and distinctive sweetness. Despite the obviously Japanese name, Kurobuta traces its lineage to England, where the English royals were said to have kept a herd of the Black Berkshire, some of which were brought to Japan by British diplomats as a gift in the 19th century.

It seems Japanese farmers embraced the black hog as their own, and developed a unique breeding program that would eventually produce what is now celebrated by gourmands all over the world as the most succulent pork you will ever taste.

WAGYU BEEF

Wagyu, the legendary Japanese cattle raised in Kobe, Japan was bred selectively and refined through breeding and diet for centuries. Renowned for its intense marbling and high concentration of fatty acids, Wagyu beef delivers a full flavour that is unparalleled by any other beef.

So famed is the taste and quality of Japanese Wagyu that variations from the United States – crossbreds of Japanese Wagyu with the superior Black Angus breed have emerged, reproducing the legend of Wagyu from the other side of the globe!
